Construction requires water service disruption to Country Greens HOA residents at Lake San Marcos

San Marcos, CA – In an effort to improve service reliability and bolster local fire hydrant flow, the Vallecitos Water District will be conducting a complete water shutdown to many homes in the Country Greens Home Owners Association on Thursday, February 9, 2012, from 9 a.m. to 5 p.m.

Along with the presence of District staff, heavy equipment necessary to make the upgrades and traffic controls to navigate around the work, there may also be intermittent flows of de-chlorinated water released from the water distribution system into the storm drain.

This discharge, which is in compliance with the permit issued to Vallecitos by the San Diego Regional Water Quality Control Board, may be necessary to protect drinking water quality during and after the work. As the discharge will comply with all environmental regulations, it should not affect water quality at local creeks or Lake San Marcos.

We apologize for any inconvenience this may cause, but as your Water and Wastewater Specialists, such upgrades are necessary to maintain the optimum system and service you’ve come to expect.

Please contact Vallecitos’s System Construction Department at (760) 744-0460, ext. 317, for more information regarding the work, and Regulatory Compliance Officer at ext. 304 for more information regarding our permit allowing Vallecitos to release water into the storm drain.

Vallecitos Water District is an independent, special district dedicated to providing water, wastewater and reclamation services to approximately 94,000 people in a 45-square-mile area that includes San Marcos; the community of Lake San Marcos; portions of Carlsbad, Escondido and Vista; and other surrounding unincorporated areas. The public is invited to Board meetings, taking place at 4 p.m. the first and third Wednesday of each month at Vallecitos’ Administration, Maintenance, and Operations Facility - 201 Vallecitos de Oro, San Marcos.
